TF Record

If loading and preprocessing bottlenecks
develop use TF Record Format

TF Record

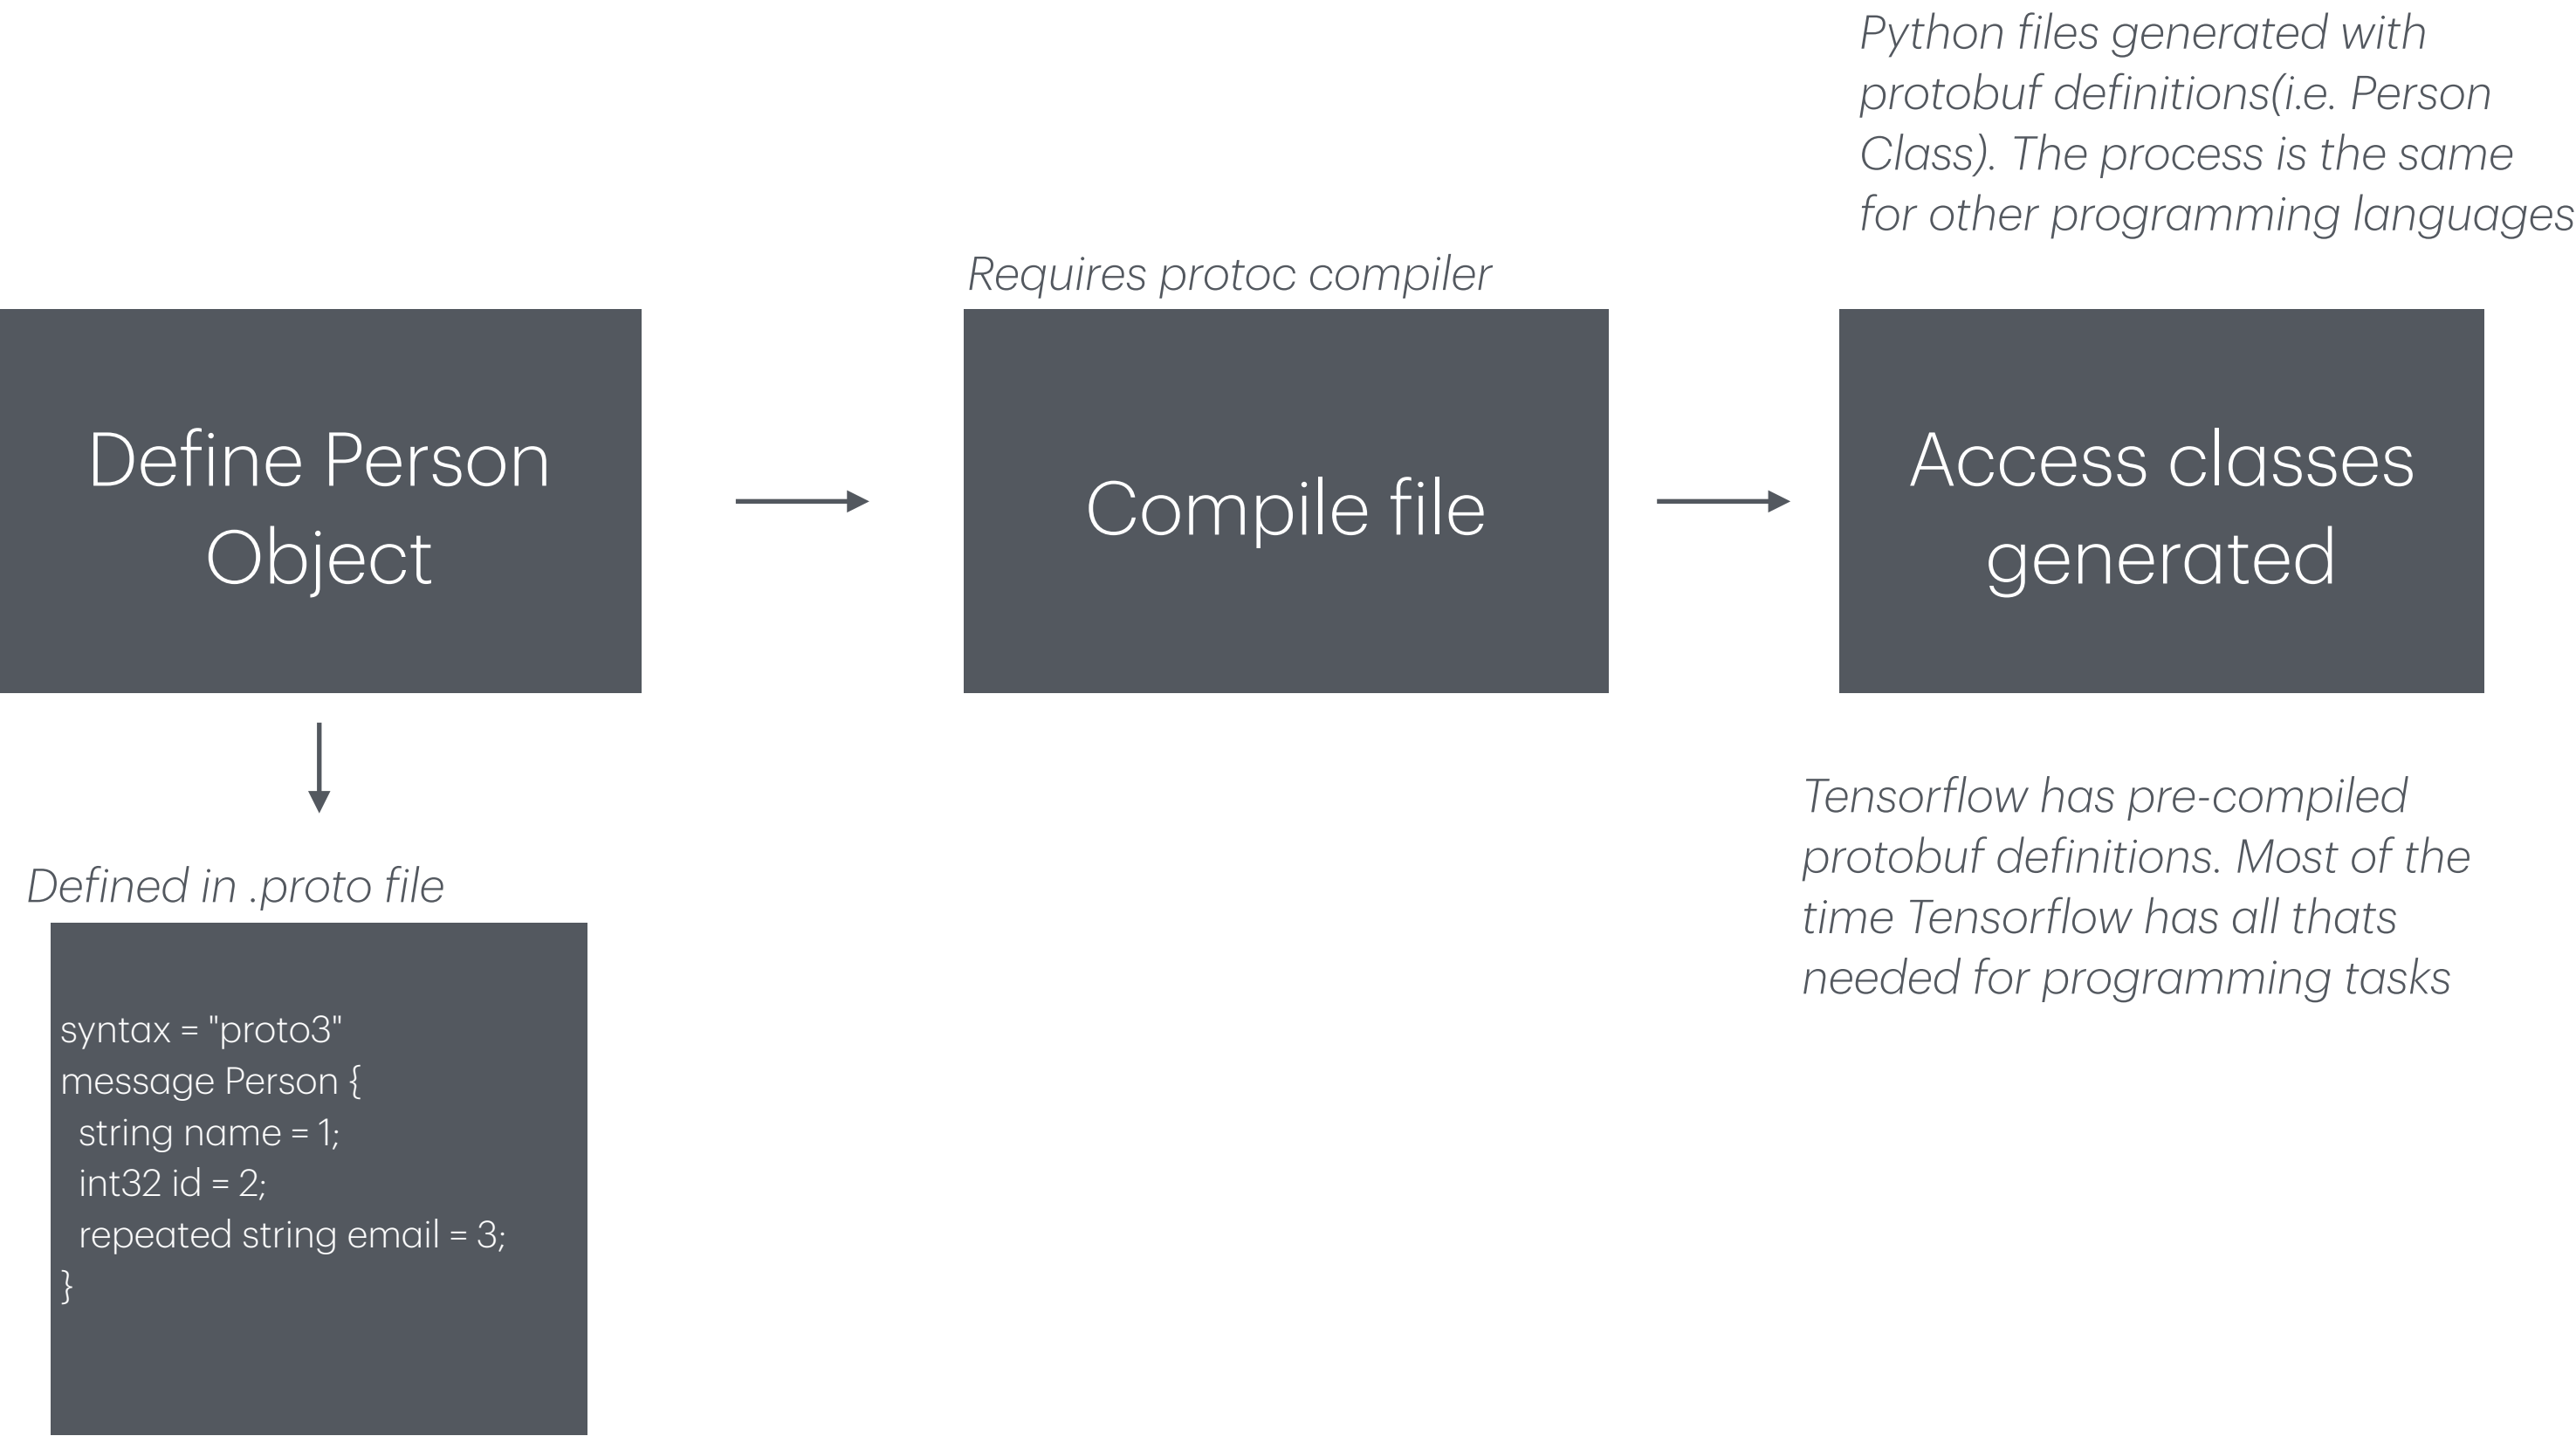

Sequence of binary records of varying sizes

Files typically contain **serialized protobufs** binary format

Format

- Length
- CRC Length Checksum
- Data
- CRC Data Checksum

Embeddings

Deployment: Case 1

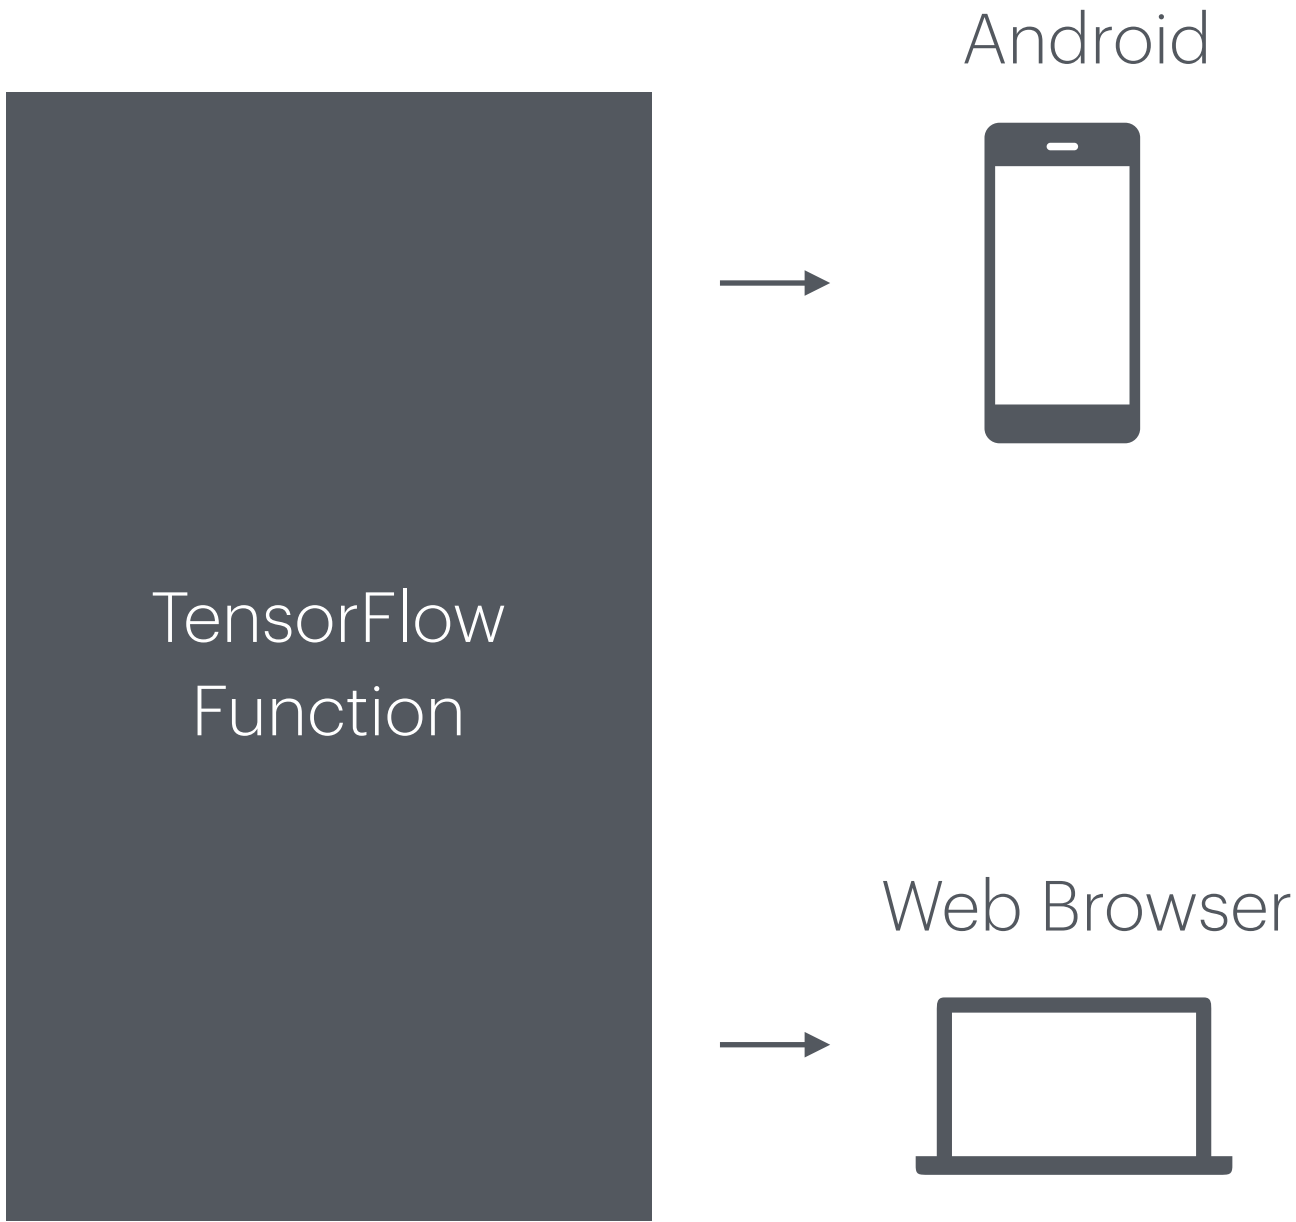

Deployment: Case 2

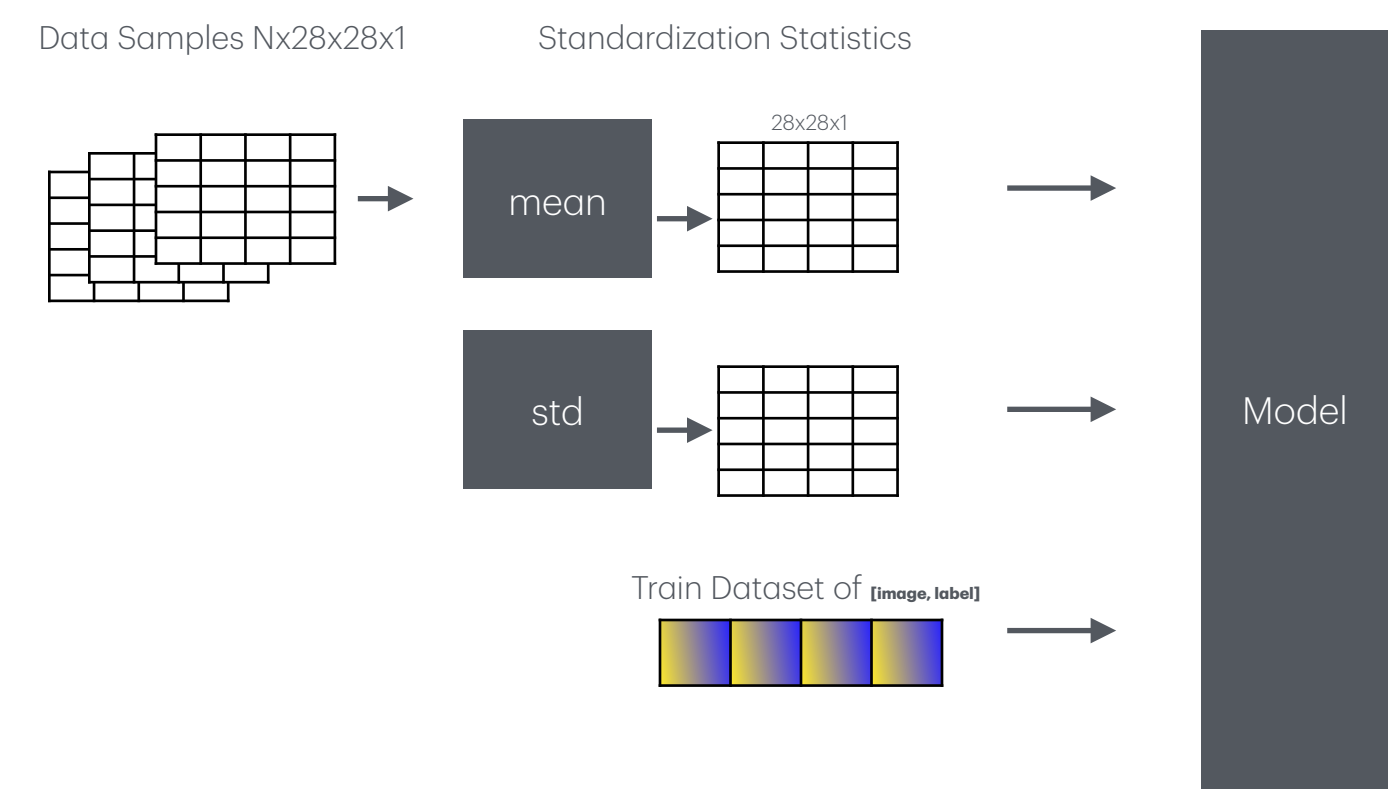

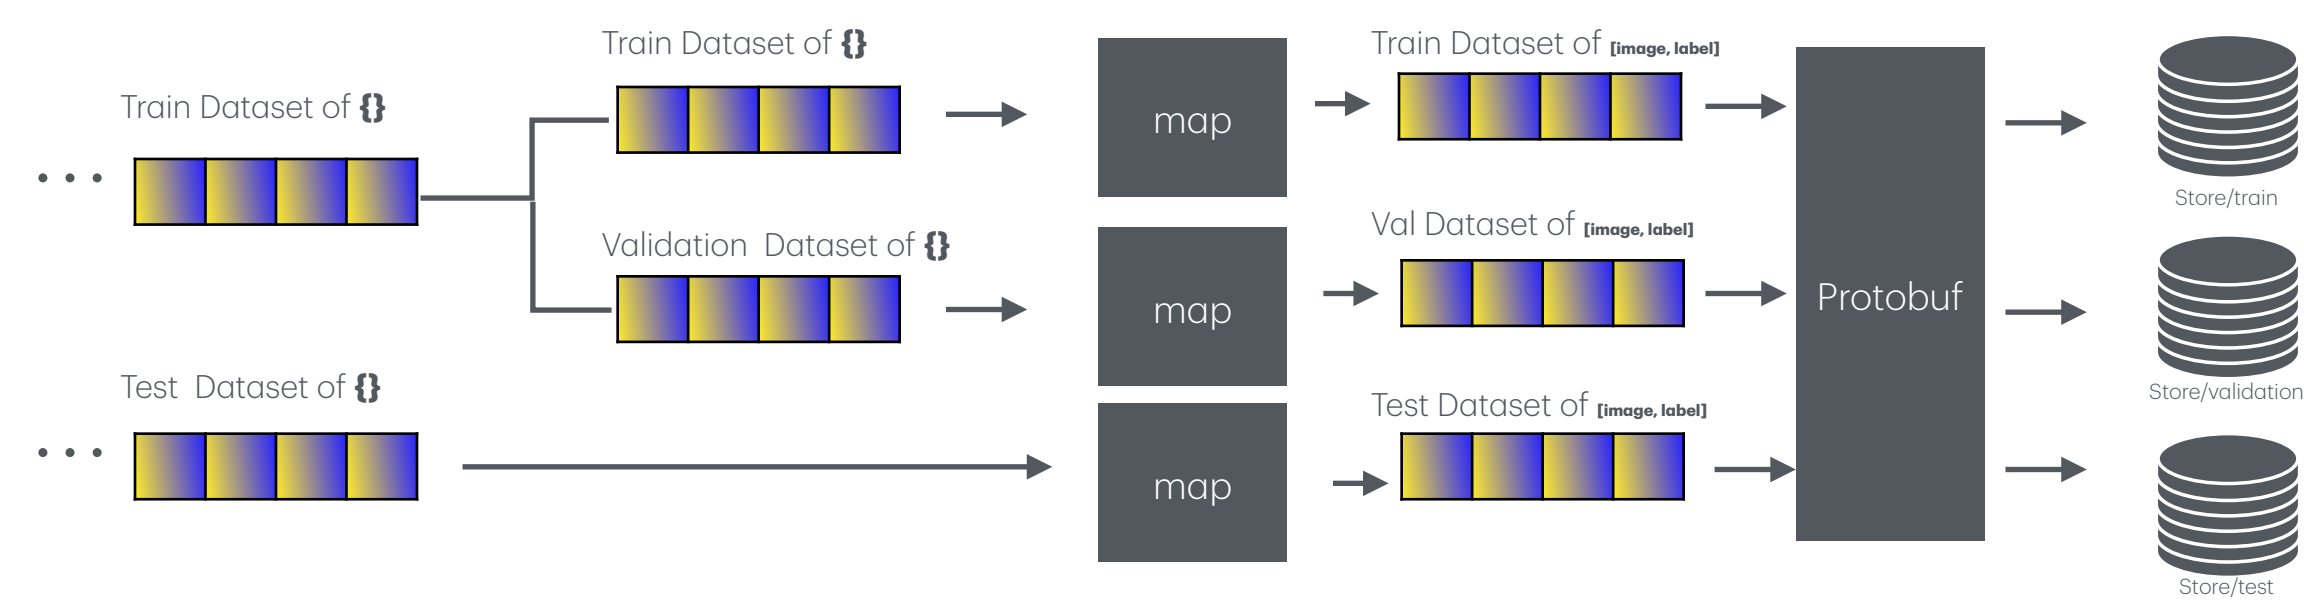

Define preprocess function for training data

TF Transform generates equivalent Tensorflow function to plug into model

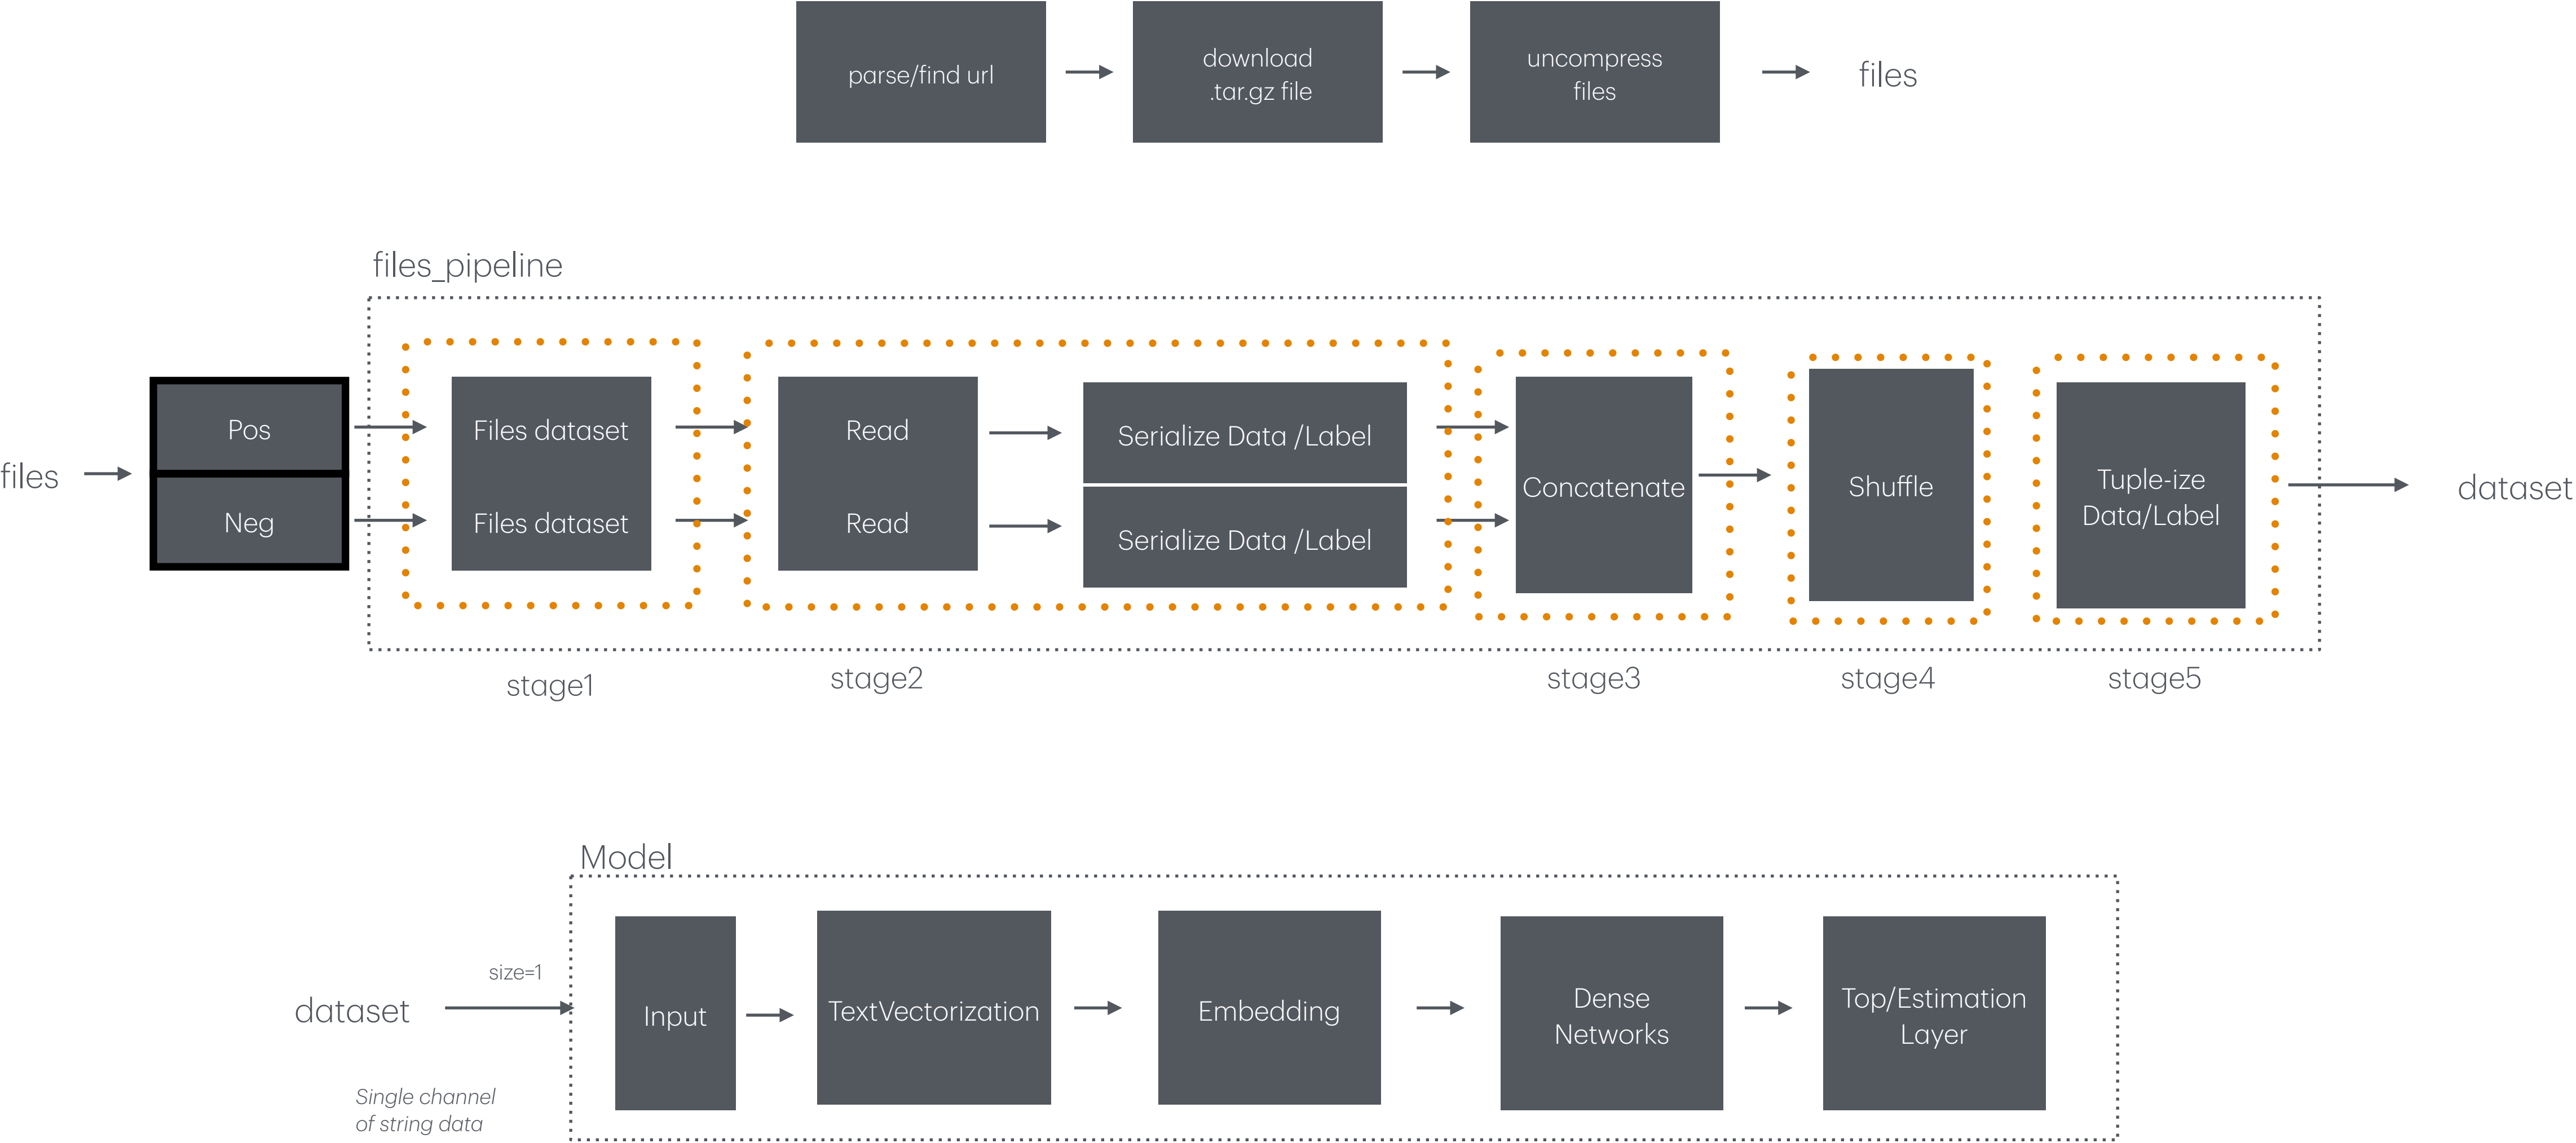

Single function
can be dropped
into any system
